Charge the Device

Connect the charger to V8 USB2.0 port and use the only approved original USB cable and the 2A power adapter.

During the period of using the V8 device, the image on the screen may be connected temporarily inactive if the device is interrupted with the charger.

Meanwhile, the screen re-calibrates itself and the V8 will don't recognize the movement of the head.

Only same type or equivalent type of battery can be replaced to the device
Batteries shall not be exposed to sunlight, such as fire or the excessive heat

FCC Note
changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - **Reorient or relocate the receiving antenna.**
 - **Increase the separation between the equipment and receiver.**
 - **Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.**
 - **Consult the dealer or an experienced radio/TV technician for help.**
